

Mews

The new workplace landscape has shifted to habitable spaces with high levels of function and flexibility. But we need more. Spaces that not only work well but make us feel good too. Positive spaces to focus, connect, collaborate and feel inspired.

Mews

Mews

Positive Spaces

Exploring the space around Mews is just as rewarding as Mews itself. We took the negative space, which is the space between, and surrounding an object, to form another space. The Mews pods can be the focus of the space, but the negative space can be just as important creating ideal spaces for collaborations and bonding with others. Mews removes the negative and make positive spaces.

Mews

Focus

A quiet space designed for visual and acoustic privacy. Lighting modes created for video conferencing and prolonged pieces of work with ventilation that maintains comfortable temperature and quality of air.

Focus

Private Spaces

Lighting Design

We have all become very aware of how we look on camera, from the first moment we log in to our video call to the moment we catch a glimpse of our faces on the attendee screen. Having that human connection is vital to gauge response and better understand the conversation. Creating a flattering environment to be seen is paramount, boosting confidence and projecting the right message for your brand. There are several elements to control to create a complimentary visual for video conferencing: lighting, colour, shape, and texture.

Video Conferencing

The VC lighting system creates loop lighting with the light source positioned slightly higher than eye level and about 30-45 degrees from the camera and to bounce light off the back wall and distribute a defused, soft light evenly across the face. The rear downlight against the back wall provides a halo effect, a flattering contrast around the head.

Whilst your Focus pod can be upholstered in any colour, on the desk wall, we recommend using natural tones that reflect a flattering colour across the face and the introduction of subtle texture can introduce interest and create visual privacy too.

Mews

Connect

A meeting space designed for visual and acoustic privacy. Controllable lighting creates a softer space to focus and share ideas. Ventilation that maintains comfortable temperature and quality of air over longer periods.

Connect

Private space to think and meet

Air Quality & Temperature

Our new ventilation system allows fresh air to be drawn in - hot air extracted out. All pods are also set to deliver 12 air changes per hour as a 'nominal' setting. Providing quality air flow and a stimulating atmosphere whilst maintaining the ambient temperature.

Acoustics

Mews offers high levels of acoustic insulation, achieved through innovative sound absorbent wall panels -

disconnecting you from the wider environment to focus, and providing acoustic privacy for calls.

Connectivity

Power to recharge USB A+C with HDMI connectivity to a screen recommended size 32".

Tables

Standard tables have an anti microbial Fenix top and rounded corners to maximise on space.

Mews

Connect Open

An informal meeting space designed for keeping in touch with your space and people around you. The slatted ceiling creates an open well lit space with different level of attachment .

Mews

Collaborate

The space around the pods delineated by curtains on the Mews grid system, creates spaces perfect for collaboration and informal lounge settings.

Mews

Sustainable Details

All our products go through VOC testing to standards for use in office environments. Mews was designed and built with longevity in mind, using quality materials that will stand the test of time. We have scrutinised every material choice to provide luxurious experience and environmental and economic efficiency at every level.
